PERMANENT MAKEUP

Imagine not having to pencil your brows,
apply eyeliner, lip liner and
lipstick every day!

You can wake up with all of these already done, giving you a natural enhancement without the effort.

No more expensive products and no more struggling to apply because of poor eyesight, dexterity or lack of experience about how to shape and enhance your particular features.

WHAT IS PERMANENT MAKEUP?

Permanent makeup is a form of cosmetic tattooing which is also known as micro pigmentation.

This involves inserting bespoke coloured pigments into the skin. The pigments I use are the best on the market and fade naturally over time, but the colour remains true and consistent.

WHY HAVE PERMANENT MAKEUP?

Permanent makeup has lots of benefits for different reasons.

- A more youthful look
- Time saving. You don't have to spend time applying makeup every morning or reapplying during the day
- Smudge proof, for when you are sweating, swimming, or just have an itch!
- Saves money on expensive products
- Naturally enhances your features
- Fills in gaps or sparse areas in your eyebrows from scarring, over plucking or thinning hairs
- Alopecia sufferers
- Chemotherapy patients
- Transgender clients
- Poor eyesight or poor dexterity making applying makeup difficult.
- Filling in scars on scalp where hair doesn't grow

WHAT TO EXPECT

Initial FREE consultation

This is very important to discuss your requirements and to meet each other in person, after all you are trusting your features to me and it is very important to have peace of mind. If you wear makeup, I ask you attend the consultation with your makeup applied, so that I can see the look you like. I may take photos of this and then we can discuss your treatment needs and options based on your face shape, facial anatomy, skin tone, hair colour, desired shape, style and colour preferences - and of course your expectations.

If you are happy to proceed with me a future date will be booked along with a **£50.00 non-refundable deposit**. You will also have a patch test carried out to ensure you don't have a reaction to the pigments used. I will also ask you to fill out a medical history form and we can discuss any reasons why this treatment might not be right for you, based on the information supplied.

WHY CHOOSE ME?

I trained as a Dental Hygienist in 1997 at Guys Hospital where I won the School Prize for that year and I have happily been treating patients ever since. I understand facial anatomy and aesthetically what suits your face shape. I'm used to dealing with nervous patients and get great satisfaction from working with people, giving them good results and gaining their trust. I am clinically trained with extensive knowledge in cross infection and decontamination.

I trained to become a permanent make up specialist with one of the industry greats Katy Jobbins, where I received one to one training.

I have had my eyebrows and upper eyeliner done by Katy, so I can appreciate what a client experiences, what to expect afterwards and the healing process.

THE TREATMENTS

Please allow a full 2 hours per treatment

BROWS

There are different options for enhancing your brows, depending on the look you require. You may want just microblading, which provides natural looking hair strokes or a combined microblading and soft powder effect or a powder brow or an ombre effect brow. 'Guybrows' are also available for men.

The procedure starts with me drawing a template of your brows, being guided by your natural brow, if you have some. Measuring takes place just to check the anatomical positioning of brows. I will ask you to check the shape, size and positioning of the brows at regular intervals to ensure you are completely happy before anything permanent is done. We will also agree a bespoke colour.

EYELINER

Eyeliner can be applied to upper and/or lower lids. This can be applied as a thin, medium or thick line and with or without a smoky effect. This is great for enhancing your eyelashes and saving time.

Thick eyeliner requires up to 3 appointments to apply gradually.

LIPS

These treatments can give a more defined border and colour to your lips that can give the appearance of fuller lips than previously. These treatments vary from a watercolour effect which is a soft powder lip tint, or a natural lip blush that has a stronger edge with a blended effect, or a more obvious full lip colour.

The pigment is not inserted into the skin around the lips, only into the lips themselves.

The full lip colour will require up to 3 sessions.

With all treatments you will be given full after-care instructions both verbally and in written format to take away with you. Photographs will be taken before, during and immediately after the treatment and again 6 weeks later at the follow up appointment.

A free top up may be required 6 weeks later at your follow up appointment.
